

META Trade Counter solutions

The storage system

META Trade Counters offer an economical but highly effective solution for applications in trade environments such as builders and plumbers merchants. The system can also be used in production area component storage/issue and also in central tool cribs.

The counters can be combined with META storage racking systems to offer an open plan customer friendly sales environment with stock close to hand to ensure quick service.

If your organisation has a Trade Sales area make META your choice to equip the area for

effective business – contact our specialist to maximise your turnover and profit.
